CIRCULATION AND DISTRIBUTION

With over three years of research in the bridal industry, Pro-Media Group's research department has left no stone unturned. Our goal is to contact, through our network of bridal registries, future brides within seven days of their bridal registration. We are consistent in contacting each bride and we mail a free copy of our magazine to her directly.

Each issue is printed fresh with updated editorial and wedding tips to make their special day a day to remember. Emerald Coast Brides magazine will be sold and distributed in Alabama, Florida, Georgia, Mississippi, Tennessee and Louisiana. Also, Emerald Coast Brides magazine will be free to all brides through www.emeraldcoastbrides.com and all bridal shows we attend.

PUBLISHED DATES

Summer, 2007 – June 1

About Us:

The Emerald Coast is fast becoming the South's premier wedding destination. It's unique reputation and beauty has become the magnet that draws romantics from all walks of life. Many brides from the South are getting away from conventional ceremonies of the past and entering into a dream of the future. The Emerald Coast can accommodate the most awesome version of that bride's dream.

Wedding service providers are seeing a vast growth in the business due to the fact the brides and grooms like the vibes and romance that they experience on the world's most beautiful beaches. Brides and grooms are flocking to the Emerald Coast for the weather, beauty and stress free feeling on one of the most important days of their lives. A beach wedding can be a simple affair with family and friends celebrating with a feeling of being barefoot in the sand. An Emerald Coast wedding can be many things, but above all it's a celebration of love.

Pro-Media Group, Inc. presents to you Emerald Coast Brides magazine and www.emeraldcoastbrides.com

Our Mission:

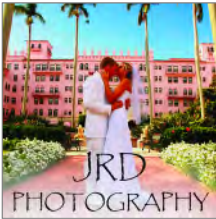

To give the bride and groom the opportunity to make their beach wedding dream come true. We make it simple and easy for the couple to live the most special day of their lives in a color of destiny. Emerald Coast Brides is the liaison for the bride to choose and research all avenues in planning her special day.

ADVERTISING PRODUCTION:

Costs for ECB to produce your black/white ad are below. Prices for 4/color ad production will be quoted upon receipt of materials.

B/W ESTIMATED COSTS ONLY:

Full Page: 250.00

1/2 Page: 125.00

1/4 Page: 100.00

DEADLINE DATE: TBA

ADVERTISING POLICES:

ECB reserves the right to review and approve advertisements. This is so that we can insure and keep our standard of quality to its highest. Ad positioning is at the discretion of the publisher. Guaranteed special placements for fractional ads carry a 10% surcharge and are offered at the discretion of the publisher. Rates and publication dates are subject to change without notice. The advertiser or its agency may not make changes and/or cancellations on orders after the materials due closing date.

PAYMENT:

There is a minimum of one third of the payment due with contract. Remaining balance is to be paid in full by space closing deadlines. VISA, MasterCard, American Express, and Discover accepted. We offer 5% off for full payment by check or credit card upon time of contract.

MECHANICAL AD SPECIFICATIONS:

Dimensions: The sizes given below show the exact dimensions to run in the area reserved for the advertisement. If the customer is providing the ad, please follow the sizes with embedded components require a new disk to be submitted by the client or agency.

| SIZE | INCHES |
|---------------------|------------|
| 1/4 page | 3-3/4 x 5 |
| 1/2 page horizontal | 7-5/8 x 5 |
| 1/2 page vertical | 3-3/4 x 10 |
| Full page | 7-5/8 x 10 |

Printing Method: SWOP

Trim: 8-3/8 x 10-7/8

Live Area: 7-5/8 x 10

Bleed Size: 9 x 11-1/2

Full Color Line Screen: 150

Black & White Line Screen: 150

Film: Emulsion side down, right reading

Please do not exceed the live area size in order to keep things from being cropped off.

Note: the rates listed above are based on ECB receiving composite film for 4/color ads on film or plate ready material for B/W ads. Otherwise, additional production charges will be incurred.

ACCEPTED MEDIA:

ECB supports these Macintosh platform storage media types:

- 3.5 diskette
- Zip 100 Mb disk
- CD ROM Dual Platform
- DVD ROM Dual Platform

Electronic files submitted via e-mail or FTP.

IMPORTANT NOTE: E-mailed images must be 300 dpi RGB/CMYK (not 72 dpi, the quality is extremely poor)

Important: Customers must supply a color and/or laser print of all files that are sent. E-mailed data must be accompanied with a viewable .jpg image proof.

Document Formats: ECB Art Department works on a Macintosh OS X 10.3 platform. Formats preferred are Adobe PhotoShop 6.0 or later, Adobe Illustrator 8.0 or later, Quark Xpress 3.2, 4.0 or 6.2, or Adobe Acrobat PDF files. All files must be flight checked to include all images and fonts needed or include within the document (converting fonts to path is also a safe method). These guidelines are set here in so that we can with efficiency offer the best quality presswork.

IMAGES:

- Color images intended for process printing should be saved as CMYK. If they are being emailed, they need to be at 100% and RGB color space file.
- Image files need to be .tif or .eps (unless emailed, then they can be high quality .jpg, a setting of 10 or higher).
- Black and White images should be saved as Grayscale.
- Desired orientation (rotation, flip, skew) is to be applied in PhotoShop or like application.
- Do not use any form of compression (jpeg etc.) on any of your images.

FONTS:

- Fonts should not be stylized in your page layout program.
EXAMPLE: Do not stylize the fonts by using [bold][italic] or other font style commands. Use the font containing the desired attribute. In the event the desired font is not available a different font should be chosen.
- All fonts must be supplied in a separate folder labeled 'Fonts'. Adobe Postscript fonts only.
- All fonts used in EPS files must be converted to outlines.

TRAPPING:

ECB does not assume responsibility for trapping on supplied electronic files.

- Desired trapping must be applied in the page layout program. The typical trap recommendation is .144 pt.
- All black print is to set to overprint.
- Be careful when setting black to overprint in instances where you have reverse boxes printing in black. You may want to trap these to avoid overlapping areas of other colors and photos.
- Be careful when setting trap on items that are layered over images as the image is considered an "indeterminate" and the desired trapping may not be applied. Printing and checking laser separations can test correct trapping attributes in these instances.
